POLITÈCNICA
DE VALÈNCIA

I am writing this review of the educational and scientific program of the **THIRD (EDUCATIONAL AND SCIENTIFIC) LEVEL FOR DOCTORS OF PHILOSOPHY MAJORING IN SPECIALTY 035 PHILOLOGY** upon request from the Department of Theory, Practice and Translation of the English Language, Faculty of Linguistics at the National Technical University of Ukraine based on my experience as academic director of the Master's degree in Language and Technology and involvement in the Doctorate School of the Universitat Politècnica de València in Spain.

Based on the general and professional competencies reviewed and the detailed examination of the educational program, resources and academic mobility, the stated purpose of the program to train highly qualified and competitive professionals, complies impeccably with the requirements of a PhD program aiming at integrating candidates into the international scientific and educational community, carry out scientific research as well as conduct managerial, translation and pedagogical activities in the sphere of Philology. Among the of the strengths of this program is that its Syllabi reflects current trends in international scientific knowledge, as well as Ukrainian scientific schools, especially those that have long been functioning at the Faculty of Linguistics such as translation studies, languages for specific purposes and communicative and pragmatic research.

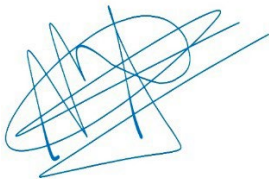

With regards to mobility, another key factor in current research in Linguistics worldwide, is that PhD students not only have the opportunity to participate in International Credit Mobility Programs on the basis of agreements between Igor Sikorsky Kyiv Polytechnic Institute and foreign educational partner institutions, but also to write their PhD thesis under the double scientific guidance having foreign experts as their scientific supervisors.

Our current collaboration from the Universitat Politècnica de València in Spain with the Faculty of Linguistics at the National Technical University of Ukraine in Kyiv, has proven to be a fruitful network of cooperation and research initiatives since 2019 and would be honored to provide our support and supervision and continue to identify further expansion of our partnership. At the moment, we have

several collaboration initiatives in progress, since our institutions are devoted to training technical and engineering students, and our background in English for specific purposes and technical communication is highly compatible.

The overview of the educational and scientific program proves that its clear structure, rational combination of the PhD students' theoretical study and practical training guarantees efficiency of their professional and scientific training. For all the above, the Program can be successfully implemented in the educational process at National Technical University of Ukraine 'Igor Sikorsky Kyiv Polytechnic Institute', Faculty of Linguistics.

Please give this review your full consideration. If you have any questions I can answer, feel free to contact me at my address below.
