To whom it may concern:

I am writing this review of the educational and scientific program of the Bachelor in Philology with Specialty 035.041 Germanic Languages and Literatures (including Translation), primary English upon request from the Department of Theory, Practice and Translation of the English Language, Faculty of Linguistics at the National Technical University of Ukraine based on my experience as a professor of the Master's degree in Language and Technology and the Doctorate School of the Universitat Politècnica de València in Spain.

Based on the general and professional competencies reviewed and the detailed examination of the educational program, resources and academic mobility, the stated purpose of the program to train highly qualified and competitive professionals, complies impeccably with the requirements of a bachelor program aiming at training future language educators and translators in the sphere of Philology. Among the strengths of this program is that its Syllabi reflects current trends in international scientific knowledge, as well as Ukrainian scientific schools, especially those that have long been functioning at the Faculty of Linguistics such as translation studies, languages for specific purposes and communicative and pragmatic research.

With regards to mobility, another key factor in current research in philology worldwide, is that their students will have the opportunity to participate in International Mobility Programs on the basis of agreements between Igor Sikorsky Kyiv Polytechnic Institute and foreign educational partner institutions, and broaden their visions to continue their master or PhD studies in foreign institutions.

Our current collaboration from the Universitat Politècnica de València in Spain with the Faculty of Linguistics at the National Technical University of Ukraine in Kyiv, has proven to be a fruitful network of cooperation and research initiatives since 2019 and would be honoured to provide our support and to identify further expansion of our partnership. At the moment, we have several collaboration initiatives in progress, since our institutions are devoted to training technical and engineering students, and our background in English for specific purposes and technical communication is highly compatible.

DE VALÈNCIA

The overview of the educational and scientific program proves that its clear structure, rational combination of the students' theoretical study and practical training guarantees efficiency of their professional and scientific training. For all the above, the Program can be successfully implemented in the educational process at National Technical University of Ukraine 'Igor Sikorsky Kyiv Polytechnic Institute', Faculty of Linguistics.

Please give her proposal your full consideration. If you have any questions I can answer, feel free to contact me at my address below:

A handwritten signature in blue ink is written over a circular official stamp. The stamp contains the text 'DEPARTAMENTO DE LINGÜÍSTICA APLICADA' and features a small crest in the center.
